Méthodes d'événement jQuery

Les méthodes d'événement déclenchent ou attachent une fonction à un gestionnaire d'événements pour les éléments sélectionnés.

Le tableau suivant répertorie toutes les méthodes jQuery utilisées pour gérer les événements.

Method / Property	Description
<u>bind()</u>	Deprecated in version 3.0. Use the <u>on()</u> method instead. Attaches event handlers to elements
<u>blur()</u>	Attaches/Triggers the blur event
<u>change()</u>	Attaches/Triggers the change event
click()	Attaches/Triggers the click event
dblclick()	Attaches/Triggers the double click event
<u>delegate()</u>	Deprecated in version 3.0. Use the on() method instead. Attaches a handler to current, or future, specified child elements of the matching elements
<u>die()</u>	Removed in version 1.9. Removes all event handlers added with the live() method

HIML C22 LEG2	KLI LIKLINGES Q
	the error event
<u>event.currentTarget</u>	The current DOM element within the event bubbling phase
<u>event.data</u>	Contains the optional data passed to an event method when the current executing handler is bound
<u>event.delegateTarget</u>	Returns the element where the currently-called jQuery event handler was attached
<u>event.isDefaultPrevented()</u>	Returns whether event.preventDefault() was called for the event object
<u>event.isImmediatePropagationStopped()</u>	Returns whether event.stopImmediatePropagation() was called for the event object
<u>event.isPropagationStopped()</u>	Returns whether event.stopPropagation() was called for the event object
<u>event.namespace</u>	Returns the namespace specified when the event was triggered
<u>event.pageX</u>	Returns the mouse position relative to the left edge of the document
<u>event.pageY</u>	Returns the mouse position relative to the top edge of the document
<u>event.preventDefault()</u>	Prevents the default action of the event
<u>event.relatedTarget</u>	Returns which element being entered or exited on mouse movement.
<u>event.result</u>	Contains the last/previous value returned by an event handler triggered by the specified event
<u>event.stopImmediatePropagation()</u>	Prevents other event handlers from being called
event.stopPropagation()	Prevents the event from bubbling up the DOM tree, preventing any parent handlers from being notified of the event
event.target	Returns which DOM element triggered the event

- HIML CSS PLUS	REFERENCES Q
	triggered
event.type	Returns which event type was triggered
event.which	Returns which keyboard key or mouse button was pressed for the event
focus()	Attaches/Triggers the focus event
focusin()	Attaches an event handler to the focusin event
focusout()	Attaches an event handler to the focusout event
hover()	Attaches two event handlers to the hover event
<u>keydown()</u>	Attaches/Triggers the keydown event
<u>keypress()</u>	Attaches/Triggers the keypress event
<u>keyup()</u>	Attaches/Triggers the keyup event
live()	Removed in version 1.9. Adds one or more event handlers to current, or future, selected elements
<u>load()</u>	Removed in version 3.0. Attaches an event handler to the load event
mousedown()	Attaches/Triggers the mousedown event
mouseenter()	Attaches/Triggers the mouseenter event
mouseleave()	Attaches/Triggers the mouseleave event
mousemove()	Attaches/Triggers the mousemove event
mouseout()	Attaches/Triggers the mouseout event
mouseover()	Attaches/Triggers the mouseover event
mouseup()	Attaches/Triggers the mouseup event
off()	Removes event handlers attached with the on() method
<u>on()</u>	Attaches event handlers to elements

triggered once per element \$_proxy(). Takes an existing function and returns a new one with a particular context ready(). Specifies a function to execute when the DOM is fully loaded resize(). Attaches/Triggers the resize event scroll(). Attaches/Triggers the scroll event select(). Attaches/Triggers the select event submit(). Attaches/Triggers the submit event toggle(). Removed in version 1.9. Attaches two or more functions to toggle between for the click event trigger(). Triggers all events bound to the selected elements triggerHandler(). Triggers all functions bound to a specified event for the selected elements unbind(). Deprecated in version 3.0. Use the off() method instead. Removes an added event handler from selected elements undelegate(). Deprecated in version 3.0. Use the off() method instead. Removes an event handler to selected elements, now or in the future unload(). Removed in version 3.0. Attaches an event handler to the unload event		
new one with a particular context ready(). Specifies a function to execute when the DOM is fully loaded resize(). Attaches/Triggers the resize event scroll().
